

## Rosenberger announces NPOI® - Neutral Point of Interface - connectivity solutions for FTTA/PTTA Applications

*High network performance for OEM and  
network operators*

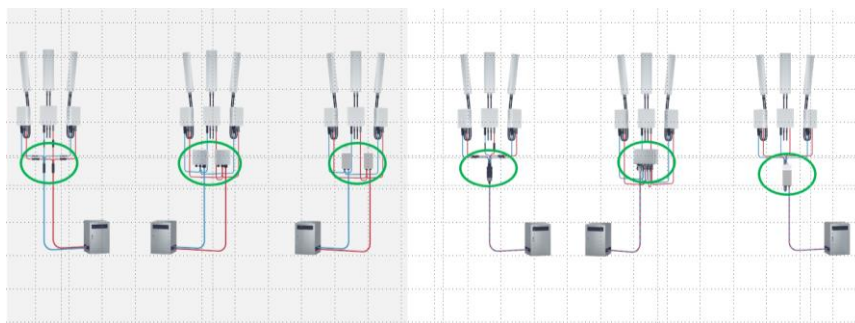

Rosenberger Site Solutions Group today announced its NPOI® - Neutral Point of Interface connectivity solutions for ensuring optimum network performance in demanding FTTA/PTTA applications.

These new products ideally meet the growing requirements of OEM and network operators for neutral points of interfaces as they move to deliver next generation services and applications driven by 5G and 6G. Quick and easy to install with non-proprietary, plug & play, tower top fiber and power interfaces, the Rosenberger NPOI® range offers highly scalable, flexible and future-proof FTTA/T and PTTA/T connectivity solutions and maximum return on investment.

“The right choice of connectivity products and solutions between BBU/PSU, RRH and antenna is now even more essential for achieving the best network performance,” said Josef Gramsamer, Director of Product Management and Business Development of Site Solutions Europe. “The challenges of site complexity and diverse broadband service delivery are already on the increase, including those for machine to machine, low latency, and ultra-reliable services.

“This will increase further with the introduction of private spectrum licenses in the enterprise and vertical sectors, the growing number of complex frequency bands, increasing requirements for co-siting, RAN sharing and the new possibilities offered by Open RAN technologies. Site sustainability is also a key factor.”

Designed and produced in-house at Rosenberger in Germany, the NPOI® - Neutral Point of Interface connectivity solutions are available in standard and tailor-made designs and configurations, in low or high volumes. They offer the highest quality to ensure a long and trouble-free operation in even the harshest of environments.

## **About Rosenberger Site Solutions Group**

The Rosenberger Site Solutions Group designs, manufactures and provides solutions for the wireless infrastructure market. Our products and systems offer innovative and leading-edge designs with focus on high performance and quality. Having an efficient network implementation in mind, we focus on total site kitting, logistics and delivery time leading to reduced cost of ownership. Globally present, the Rosenberger Site Solutions Group offers extensive local support making Rosenberger Site Solutions a partner instead of just a supplier.
